Trust Chem Hosts 30th Anniversary Celebration and New Headquarters Opening Dinner

On 30 October, 2026, Trust Chem Co., Ltd. (Stock Code: 001335.SZ) held its 30th anniversary celebration and new headquarters opening dinner. The relocation ceremony had been held a week earlier, on 23 October. The dinner continued the celebration and reflected on three decades of growth.

Starting from a small founding team, Trust Chem has focused on organic pigments for thirty years and grown into a global provider of organic pigment and acid dye solutions, with multiple overseas subsidiaries, multiple production bases, and a modern headquarters and R&D center—completing its transformation from a local enterprise to a global player.

At the dinner, the Chairman reviewed the company's 30-year journey and thanked employees for their sustained efforts. He noted that while scale and market reach continue to expand, the commitment to organic pigments remains unchanged: "A brand is not built by slogans—it is built order by order over thirty years." Persistence in quality and commitment to customers are the foundations of Trust Chem's journey.

The new headquarters marks an important milestone and lays a solid foundation for the company's next chapter.

KKDIK: Turkey REACH Regulation

Q1 What is the KKDIK regulation, and who is the competent authority?

KKDIK, commonly known as the Turkish REACH regulation, is Turkey's regulation on the registration, evaluation, authorization, and restriction of chemicals.

Competent authority Ministry of Environment, Urbanization and Climate Change of Turkey (MoEUCC).

Registration Scope Substances manufactured in or imported into Turkey at ⩾1 ton/year.

Registrants Turkish Manufacturers, Turkish Importers, and Turkish Only Representative (OR).

Q2 As an overseas enterprise outside Turkey, should Trust Chem have the Turkish importer register independently, or appoint an OR?

Chinese chemical companies cannot submit registrations on their own; they must appoint a Turkish Only Representative (OR). TCT (as a subsidiary of Trust Chem) is the Only Representative for Trust Chem's KKDIK project. We will submit the registration as TCT through the official KKS system.

Q3 What is the progress of Trust Chem's KKDIK registration?

The main compliance stages are sequentially divided into: Pre-registration, Interim registration and Full registration.

Pre-registration

Trust Chem began pre-registering the relevant substances as early as 2020.

Interim registration

At present, the vast majority of Lead Registrants (LRs) have not yet published their LOA (Letter of Access) data quotations or have not completed full registration. Under the regulatory requirements, companies may consider an individual interim registration by the end of September 2026. To date, our company has successfully obtained interim registration numbers for 54 substances, ensuring compliant market access for the relevant products in the Turkish market.

Full registration

Interim registration is only a transitional measure; companies must still complete full registration before the corresponding tonnage deadline. The tonnage buffer deadlines are: >1,000 t/y (31 December 2026), 100–1,000 t/y (31 December 2028), and 1–100 t/y (31 December 2030). Trust Chem will proactively follow up on the LRs' data updates and registration progress, and will complete the corresponding full registrations at the earliest opportunity to fully ensure compliant delivery for our customers.

CHINACOAT 2026
Exhibition Recap

Our industry gathering in Guangzhou has come to a successful close. This year marks both the 30th edition of CHINACOAT and the 30th anniversary of Trust Chem—two milestones meeting at one exhibition, making this gathering all the more meaningful. It was a welcome opportunity to reconnect with old friends and new partners across the value chain.

During the exhibition, we welcomed many visitors at Booth 1.1E57 from the coatings, inks, and plastics industries. Discussions covered market trends, supply chain stability, application development, and compliance management, with candid exchanges of observations and needs.

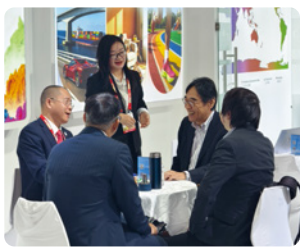

This gathering was a two-way conversation. Guided by a steady and pragmatic approach, we remain committed to providing reliable solutions and services built on years of industry experience.

While the on-site meetings have concluded, long-term collaboration is just beginning. We look forward to building on the connections made at the exhibition, continuing to respond to our partners' needs, and exploring more opportunities together. Thank you to everyone who visited our booth—we look forward to seeing you again!
